The late Paul Cappola Sr. buried Jimmy Hoffa's body. . . . The only person he told was his oldest son, the late Frank Cappola. . . . The only person Frank told was me.

After our thirty hours of exclusive interviews and at my request, Frank executed a sworn declaration on October 7, 2019, detailing what his father told him, as well as my role in uncovering this information.

Frank's affidavit, attached, is the centerpiece of the FBI's current investigation of Hoffa's alleged unmarked grave in an alcove under the Pulaski Skyway in Jersey City.

Eric Shawn of Fox News had one brief interview with Frank on October 11, 2019, which I arranged. . . . Eric Shawn was at the ground-penetrating-radar (GPR) examination at the site on November 24, 2020, because I invited him. He was so grateful that he had Fox pay for the test.

There is a long paper trail about all of this. And I will have much, much more to say after the FBI renders its final decision.
